FEATURED IN THE
AWARD WINNING FILM

TIGERS
TRACKING A LEGEND

20 WAYS TO TRACK A TIGER

1. Partner with Elephant Mahavats
2. Identify the Tracks of a Tiger
3. Target Tiger Territories
4. Track the Tiger's Direction and Speed
5. Look for Tiger Claw Marks
6. Smell the Scent of a Tiger
7. Hunt for Traces of the Tiger
8. Discover Evidence of the Tiger's Nighttime Hunt
9. Identify Tiger Markings
10. Predict the Travels of the Tigress and Cubs
11. Explore the Tiger's Cool Caves
12. Keep Track of Tiger Cubs
13. Be Alert for the Tiger's Predators
14. Identify Tiger Sounds
15. Listen for Wildlife Alarm Calls
16. Look for Signs of Captured Prey
17. Follow Scavengers
18. Watch the Waterholes
19. Follow Wild Deer Herds
20. Anticipate Different Hunting Techniques

***The TIGERS Experience interactive adventures
are linked to 20 Ways To Track A Tiger!***

20 WAYS TO TRACK A TIGER

**Gold Award for Independent Publisher Print Book Award
("IPPY") for Best Animal Book**

**International Wildlife Film Festival Winner-
Best Cinematography & Young People's Award**

Cine Golden Eagle Award -

Film Excellence in Cinematography for Wildlife Documentary

WINGS WorldQuest - Dedicated to Visionary Women Explorers

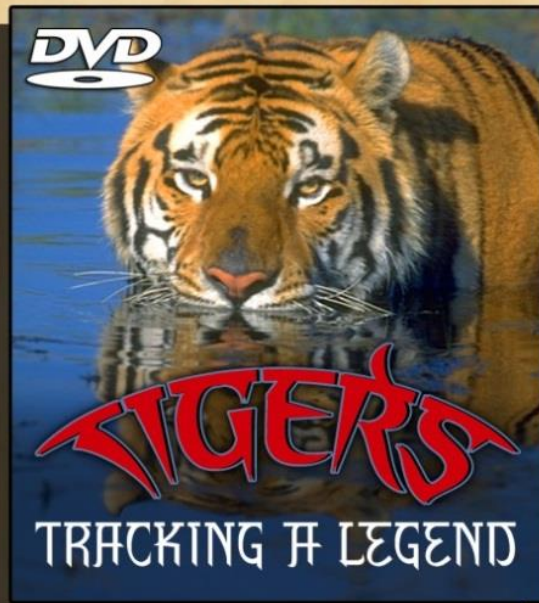

Groundbreaking Film and Exploration Award Winner

Gilbert M. Grosvenor, Chairman Emeritus, Board of Trustees, National Geographic Society

"20 Ways To Track A Tiger is a ten-strike. A photographic treat. Carol Amore, explorer extraordinaire, pays homage to the majestic tiger with compelling images and fascinating stories. With the passion of an explorer she stalks, captivates, and uncovers the spirit of the tiger in the Indian wilderness."

20 WAYS TO TRACK A TIGER Book links to TIGERS – Tracking a Legend Film Story

Join a Mahavat (tiger tracker) and his son on their trusted elephant as they venture into a wild paradise for an intimate look at a Bengal tigress and her cubs. Filmed in India's Bandhavgarh Tiger Reserve, this story traces the lives of a wild tigress named Bachhi and her two young cubs, Badi and Choti. As they grow, the cubs will face a variety of threats from cobras and pythons, to sloth bears and leopards, and even other tigers. In the surrounding forest, another drama unfolds: Charger, an old dominant male tiger, is being challenged by his son Banda.

As viewers of this extraordinary film witness dramatic stories play out, they'll also learn how to track tigers. They'll witness the rivalry between male tigers for territorial dominance. And they'll watch as Bachhi's cubs grow up, exhibiting very different personalities, using unique calls to communicate with their mother.

“TIGERS is a remarkably creative sensory exhibition combining the beauty and majesty of the tiger's natural history with the science using advanced research and current touch screen technologies to access different levels of learning. The tiger/cat genome information reveals the critical findings of tiger subspecies and even the discovery of diseases affecting humans. Humans need tigers to understand more about themselves.

Delightful and moving, the exhibition’s immersive images and interactives will bring you closer to evolution's most charismatic creation causing a sense of urgency to save tigers.”

**Stephen J. O'Brien, Former Chief,
Laboratory of Genomic Diversity,
National *Cancer Institute*,
*United States of America***

NEW Indian Field Biologist- Jungle “Genomic” Camp

Provide fun hands-on interactive comparative Indian wildlife genome learning experiences using Next Gen 2019-2020 field biologist genome advanced assessment technology tools

Conduct Comparative Wildlife Biology Analysis- Life Science learnings

- Compare different Bengal tigers within the same Indian jungle to learn their genetic similarities and differences
- Show instant genomic data readings with easy interpretations for all ages

Provide Online Genome Teaching Resources- National Human Genomic Research Institute(NHGRI) and other noted multi-media resources

Use NHGRI existing and new comparative genomic wildlife data comparisons
(Learn new ways to compare meaningful data to humans to wildlife)

Some Indian Wildlife Genome Explorations- Indian Wildlife-Bengal Tiger, Indian Leopard, Indian Wolves, Wild Indian dogs, Indian Jackals, Indian Hyena, Indian Bison, Indian Ratel(Honey Badgers), Asian Elephants, (Potential Indian Rhino)

Tiger's Indian wildlife prey genomic profile-- Chital deer, wild boar, Indian monkeys, birds

NEW Indian Field Biologist- Jungle “Genomic” Camp

Hyenas will attack the
tigress & her tiger cubs

Blaire Van Valkenburgh, Ph.D., Professor of Ecology and Evolutionary Biology, University of California, Los Angeles states:

“TIGERS exhibition gives in-depth attention to the science involved with tigers and the art of engaging visitors from around the world through interactive experiences. The Canine Bite Force and Carnivore Capture exhibits use new research to portray the realism of the tiger’s canine bite and how it hunts.

Inside The Tiger offers advanced CT scan technology to reveal the ins and outs of tiger and human anatomy to allow for captivating display comparisons. Building on the latest discoveries in behavior, anatomy, and genetics, TIGERS is a fabulous educational experience.” The science and technology behind the TIGERS exhibition interactives are world class.

**Bengal Tiger senses
Indian wolf pups in its
territory and the wolf
defends its den area**

TIGERS

Roaming Free Song/Poem

Verse 1

Looking into the tiger's eyes, I see no fear
Always ready to fight when predators appear
She protects her cubs that are so dear
Listen to her heart and find love near

In an endless hunt from dusk to dawn
She prowls the dark to find a fawn
Always ready for a ferocious fight
Seizing prey before the morning light

Chorus(2x)

Find me near the sacred Banyan trees
Camouflaged in the cool bamboo breeze
Find me swimming in the mangrove reeds
Find me; find me, as my spirit roams free

Verse 2

Claws and jaws are her weapons at night
Fending off rogues and sending them to flight
Protecting her domain with all of her might
Keeping curious cubs safe and out of sight

The sun rises like a prayer with caring light
The tigress calls to her cubs to reunite
With a touch of affection and a loving bite
She knows she will leave them again tonight

Chorus(2x)

Find me near the sacred Banyan trees
Find me hiding in the cool bamboo breeze
Find me swimming in the mangrove reeds
Find me; find me, as my spirit roams free
